

INTEGRATED ART COURSE SURVEY

Judy Redditt TN License Art K-12

Integrated art fuses and connects with all areas of learning in an effort to deepen a child's knowledge and understanding of visual arts. The following survey gives areas of art integration. Each child will explore basic art skill techniques, elements and principles, communication, and art application with other curriculum areas. The classes will be taught in an atmosphere positive reinforcement, self appreciation, and creativity.

The integrated art classes will give each child a step-by-step process in which to find greater understanding and new avenues of expression in creative thinking, and basic creative steps that can be followed and incorporated into other curriculum areas.

The following survey, expressing your level of interest, will be used as a tool to assist in developing classes.

For the classes to be offered the survey must be completed by **March 15th, 2005**. Each class and summer workshop must have a minimum of 10 students and no more than 25.

The April Newsletter and Collierville Web Site will have a list of classes, supply cost, and dates

Name _____ Address _____

email _____ phone _____

I am interested in the following class schedule: Saturday () Evening classes () Summer workshop () Summer classes () Fall ()

Watercolor/Personal Observation, Self-Expression
